Maandag Meubels: Durable Elegance

This outdoor chandelier brings a soft glow of candlelight creating a sensual ambience in the evenings, while serving as an elegant decorative piece in the day. Made of weathering steel, it is durable and its simple structure makes it easy to assemble by hand.

Niero: New African Rhythm

The techniques of old and new are used to create the J-Low Chaise. Student-designer John Niero borrowed the idea of an African tribal chair and designed it using 3D data that was then outputted to a computer numeric-controlled machine. This replaces hand-carving with a precision mould, allowing the chaise to be mass-produced.

Jade: Sensual Rest

With its soft sexy curves, Jade's lounge chair was designed to create a meditative environment. The east-meets-west chair is available in four finishes - Natural, Weathered, Clear Sealer and Dark Sealer.

HOMEbase Furniture: Practical Elegance

The Venice collection from HOMEbase Furniture, consisting of a table and stackable chairs, brings a Scandinavian style to the terrace. Practicality merges with elegance through the design of the chair, thanks to its bold, stylish backrest which extends down to the legs. They are hand-woven using Viro synthetic fibre that gives high flexibility as well as tear, weather and UV resistance properties.

Dedon: Fallen Leaf

Leaf garden collection comes with a central indentation running alongside for a lingering rest. Its head section includes a pillow made of water permeable porous rubber foam. The leaf comes in two different sizes as single or double bed.

Neo Studios: Versatile Concept

Equally suited for the outdoors and indoors, the V chair features a mesh of Vs at the legs, a concept inspired by the traditional construction of a bridge or tower. It displays strength, stability, comfort and lightness, further showcasing its versatility with a special edition for kids.
